## AIR HAMBURG renews Wingman certification

Successful completion of the audit is proof that a company's leadership has identified safety as a core value and that its team embraces excellence at all levels. Air Hamburg is celebrating its Wingman achievement.

**AIR HAMBURG has once more secured its designation of Wyvern Wingman Certified Operator.**

German charter operator Air Hamburg has once more secured its designation as a Wyvern Wingman certified operator following a successful audit conducted by Wyvern in September 2021. The Wyvern Wingman standard provides a safety benchmark that allows air charter customers to assess performance expectations against recognized industry best operating practices before purchasing air charter services.

Wyvern Wingman operators are evaluated by the Wingman standard criteria, the scope of which includes operational activities, a review on the company operational history and safety records, safety management system, internal evaluation programme, administrative compositions, technical documentation, pilot and aircraft records, training requirements and maintenance operations including technician training and experience.

"We at Air Hamburg are proud to be able to renew our Wyvern Wingman status without any findings," says director of safety management Alexander Stevens. "It shows that even while rapidly growing our fleet we have never lost the focus on safety. As always it has been a pleasure working with Allison and her team, and we look forward to continue doing so in the future."
